Flock Evaluation Report - by lamb's breed 2019-8-1 au 2020-08-01
BREEZY RIDGE FARM(1584) | PHILIP & ELIZABETH SMITH

GenOvis Flock Evaluation Report for Breezy Ridge Farm - August 1, 2019 to August 1, 2020.

The small table across the top shows that 562 ewes lambed a total of 628 times during the 12-month period, with lambing occurring in November 2019 as well as February, March, April, May, June, and July of 2020. A total of 1497 lambs were born for an average of 2.4 lambs born per lambing.

The larger table further down shows the productivity of ewes of different ages, with these totals combined in the first shaded row. The average lambing interval in the flock was 292 days. 2.24 of the 2.38 lambs born per lambing survived until weaning. The average production per ewe for the year was 59.1 kg (130 lb.) raised to 50 days of age.

The Breezy Ridge production for Aug 1, 2019 to Aug. 1, 2020 is contrasted with its production in the previous 12 months (Aug. 1, 2018 to Aug. 1, 2019) on the second shaded row, and with the average of all flocks of the same breed (Rideau Arcott) registered on GenOvis for Aug. 1, 2019 to Aug. 1, 2020 on the third shaded row.
